Company Overview

OUR ONLINE is one of the leading ISP in Chattogram providing seamless and secured connectivity through fiber optics. We are the prime service provider for domestic connectivity services and solutions duly authorized by the Bangladesh Telecommunication Regulatory Commission (BTRC).

AND offers connectivity services and solutions for Data, Voice and Video customers through a combination of an optimal mix of state of the art technology and creates synergy.

Back in the Network Operation Center (NOC), Our Online has a series of powerful and professionally built servers that run on world famous UNIX platform, to provide legendary stability and rock-solid security to its valued clients. We use world famous Mikrotik Routers and Switches to manage our Network both at NOC and PoP level to enable secured and stable connectivity. Our Online has 24 hours network monitoring system, 3 level power redundancy, fire protection systems at our NOC to keep the service up and running 24/7/365 basis.

We facilitate the clients, employees and stakeholders in achieving what matters to them. Succeeding will mean living by Our Online's values - Trust, Teamwork, and Accountability - and value creation for all concerned.

Our core competency is in the ability to converge technologies with human excellence for "Simplifying Connectivity".

Our Online Features

- We are the service provider in Bangladesh who has multiple satellite earth stations (Hub) with DR Site and supports.
- We are the Service Provider in Bangladesh capable to provide backup media in case of any media failure.
- Connected primarily to SEA-ME-WE-4 for Internet along with proper redundancy planning.
- Offers maximum possible redundant infrastructure over the SEA-ME-We-4 to its clients having Internet Backbones, VSAT from SingTel.
- Has POPs (Chittagong City) in all convenient locations of the City.
- Corporate Internet Service & Data Connectivity Provider and have years of experience of serving corporate clients.
- Provides MRTG (Usage Graph) access to clients so that the client can monitor what bandwidth is being used and what is allocated.
- Help Desk is available 24 x 7 and we are maintaining ticket system.
- Use famous brands for building infrastructure and end user connectivity (ONU).
- We have specialized professionals to find out the unique requirements of our valued client and we design and maintain client end server just the way our clients prefer.
